What to do

The screenshot displays a web application interface with a browser window at the top. The browser's address bar is empty, and the page title is "Project Info". The navigation bar includes links for "Home", "Project Info", "Planning", "Estimate", "Kanban Board", and "Upload". A green warning message is visible: "Warning! When Task move to state DONE, need approve by adviser".

Below the navigation bar, there is a section titled "Summary flow" with a value of "1680 hr.". This section contains a Kanban board with four columns: "Developer", "TODO", "DOING", and "DONE". The "Developer" column lists three team members: "Army", "Mark", and "Fang". The "TODO" column contains two tasks: "Authentication" (user login/logout) and "Dashboard" (display progress). The "DOING" column contains one task: "Proposal" (document proposal abstract). The "DONE" column is empty.

Below the Kanban board, there is a form titled "When Click" (handwritten in blue). The form includes the following fields and controls:

- Name: Text input field.
- Description: Text area.
- Dependency: Dropdown menu with "Item 1" selected.
- Complexity: Dropdown menu with "Item 1" selected.
- Time estimates: Input field with "2hr" entered.
- Buttons: "Save changes" and "Cancel".
- Warning messages: "Warning! When input time, time summary decreasing" and "Warning! When lock other people can't move task".

Red arrows indicate the flow of data and interactions between the Kanban board and the form. One arrow points from the "Authentication" task in the "TODO" column to the "Name" field in the form. Another arrow points from the "Proposal" task in the "DOING" column to the "Description" field. A third arrow points from the "Time estimates" field to the "Save changes" button. A fourth arrow points from the "Warning! When lock other people can't move task" message to the "Cancel" button.
